Good afternoon all.

Please see the final signed letter. The Front office added some language about the coordinator request. Thanks for all of your help.

Thanks everyone! The letter looks great. Can I recommend on small addition?

In the Brownfield paragraph (with Allen's approval), can we add after "A site and the potential recipient of brownfields resources must meet certain criteria in order to receive brownfields assistance."

"Sites that have open RCRA or Superfund actions are not eligible for brownfield grants until those remedial projects are complete."

Importance: High

Good evening All.

First of all, thank you all for working with me to gather all the information needed to respond this request, especially Scott and Heather from GLNPO who had to provide a significant part of the response. The response has been finalized and reviewed through Joe Cisneros (LCRD) and Marc Tuchman (GLNPO) as of right now. I thought it best to get their input prior to putting the final response through sign off since most of the content is related to site work in both of those divisions. The response is currently going through official sign off through the LCRD management chain in eSign and is with LCRD's front office as of now. The response is linked below in case others outside of the LCRD management chain would like to take a look. **Our Division APA said the response is due to the RA's front office at least 3 business days before the deadline of 3/30. I apologize for the quick turnaround request.** I will be out of the office for the next two days, so please work with Valerie Voisin if there are any questions.

 [March 2022 Control response Dingell Arkema HW Draft.docx](#)

The RA has not shared a specific plan to assign a coordinator per Congresswoman Dingell's request so I drafted a short response committing to a continued collaboration between all the Divisions in the Wyandotte and Riverview Communities as it relates to environmental site work.

Thank you,

Shilpa S. Patel

Subject: RE: CMS New Assignment - Jesse McDaniel - R5-22-000-2691-C

Hi Shilpa,

Here is my suggested writeup on brownfields for the response letter. Thank you Scott for your suggested language.

Brownfields are defined as “real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant.” The definition of a brownfield is very broad and many sites in the Downriver area can be classified as a brownfield, but that does not necessarily mean that all of those sites are eligible to receive brownfields resources. The site and the potential recipient of brownfields resources must meet certain criteria in order to receive brownfields assistance. The Region 5 brownfields program currently has no on-going activities at any of the Downriver sites mentioned in your letter, but state and local governments and other quasi-governmental entities may be eligible to receive brownfield assessment or clean-up grants, targeted brownfields assessments (TBAs) or other technical assistance provided eligibility requirements are met. The Region 5 brownfields program is available to provide additional information on the resources that may be available to Downriver communities.

Let me know if you have any questions or comments.

Allen Melcer

Manager, Redevelopment & Program Services Branch

Allen:

Can you provide any specific text that you would like to see in the response letter? Could be as simple as "Brownfields currently has no on-going activities at any of the downriver sites mentioned in your letter, but may be able to provide targeted brownfields assessments (TBAs) or other technical assistance provided the site meets eligibility requirements."

It would be good to have specific text with format and content that Brownfields prepares rather than Shilpa and I trying to reduce your response and potentially missing the mark.

Thanks,

Subject: RE: CMS New Assignment - Jesse McDaniel - R5-22-000-2691-C

Hi Shilpa,

In the discussion of the response to Congresswoman Dingell's letter there has been mention of Brownfields past activity and possible future activity in the downriver area. First, the definition of a brownfield is very broad and many sites in the area in questions can be classified as a brownfield, but that does not necessarily mean that all of those sites are eligible to receive brownfields resources. To be eligible for a brownfields assessment or cleanup grant the site cannot be subject to EPA corrective action, be proposed or listed on the NPL or is subject to a removal action under CERCLA. It also cannot be subject to an open EPA enforcement action. Finally, the site can't be owned by any entity that may have caused or contributed to any contamination.

The following list is of the recent brownfields work in Detroit and downriver. I don't think any of these sites are the ones referenced in Congresswoman Dingell's letter.

FY	Grantee	Address	City	Congressional Representative	Congressional District
	Detroit Wayne County Port Authority	130 Atwater Street	Detroit	Brenda L. Lawrence (D)	14th
2011	Detroit Wayne County Port Authority	130 Atwater Street	Detroit	Brenda L. Lawrence (D)	14th
2017	Detroit, City of (A)	2 Woodward Avenue	Detroit	Brenda L. Lawrence (D)	14th
2019	Detroit, City of (C)	3621 W Jefferson Avenue	Detroit	Brenda L. Lawrence (D)	14th

2019	Wayne County Brownfield Redevelopment Authority	500 Griswold Street	Detroit	Brenda L. Lawrence (D) Debbie Dingell	14th
2010	Downriver Community Conference	15100 Northline Road	Southgate	(D) Debbie Dingell	12th
2020	Downriver Community Conference	15100 Northline Road	Southgate	(D)	12th

We can provide targeted brownfields assessments (TBAs) or other technical assistance provided the site meets eligibility requirements.

Subject: RE: CMS New Assignment - Jesse McDaniel - R5-22-000-2691-C

Thank you Scott C for sharing yours and Mark's input. I agree that the primary request of the agency is to coordinate across the federal/state programs. I believe the DDs were scheduled to discuss the topic this morning, so I hope we hear some additional information regarding that topic. Generally speaking, I agree that there are details in the letter than can be removed and/or further summarized and the letter can focus on specific Arkema/BASF/GLCC UTC updates and the main ask as you suggest.

The one additional item it may make sense to include in your list, if there was any that is, is to share any significant redevelopment/cleanup news for the area outside of Arkema/BASF to address the points the Congresswoman makes regarding progress being slow and the communities wanting to see progress. Maybe Superfund/Brownfields will have something to add here.

With that said, I will work with Valerie to make further updates the letter.

Any other thoughts others had?

Thanks all
Shilpa

Williams, Heather <Williams.Heather@epa.gov>

Subject: RE: CMS New Assignment - Jesse McDaniel - R5-22-000-2691-C

All:

I have discussed our response letter with Marc Tuchman and based on the questions and requests included in the incoming control letter, we think that our response letter can be significantly simplified from the current version.

The incoming letter makes a couple of points: (1) the communities are interested in seeing progress and want to be partners in the cleanup effort, and (2) progress has been slow. The letter also makes one specific request, please assign a Region 5 coordinator that can coordinate with the community and across state and federal programs. Given the scope of the incoming letter, I think our response letter can be significantly simplified and directly address the Congresswoman's points and request.

I suggest that the response letter simply include:

1. An introduction paragraph thanking the Congresswoman for her letter and indicating that we have been coordinating across programs and are committed to working with the communities (current paragraph is good),
2. 2-3 sentences updating status of the GLLA UTC project (e.g., wrapping up design and anticipate both a final design and a GLLA application from the industry partners in early 2023),
3. 2-3 sentences updating status of the Arkema upland/groundwater site (I will leave this text to LCRD),
4. 2-3 sentences updating status of source control efforts at Northworks,
5. A paragraph communicating Debra's decision regarding providing a Region 5 coordinator (Text TBD)
6. A conclusion paragraph thanking the Congresswoman for her letter and identifying a POC (current paragraph is good)

Let us know what you think.

Thanks,

Subject: RE: CMS New Assignment - Jesse McDaniel - R5-22-000-2691-C

Good evening all,

I was asked to work with Valerie and Heather on a draft response to the Congresswoman Dingell's attached letter (see PDF). Thank you to them for quickly putting this draft together. The draft response is linked below. **The draft is due to the Front office by March 14th so please aim to get any comments and edits in by March 8th so that we can give any DD who would like to review the response time to do so.** In order to meet this deadline I'm hoping all the programs can concurrently work on the response. Even so, we may need an extension due to all the programs that have to coordinate on this response.

https://usepa-my.sharepoint.com/:w:/g/personal/voisin_valerie_epa_gov/EY-wyhGXiWpCdpdXFTSBFFYBtde9iFFdNJ3bcXRXe1S6Sg?e=UjaqhX

There are comments in the draft for the Superfund, GLNPO, Front Office and Brownfields Programs to respond to. Please use the link above to make your edits, so that we don't have issues with various versions flying around. If you can't access issues, please let Valerie and/or me know.

Jeff/Eileen,

I'm hoping you can provide some insight to the group on the coordination efforts described in the letter. It would be helpful to know what the RA is thinking so the programs can respond accordingly. Does the RA want a community planner/coordinator across the programs? If so, the other programs can respond accordingly. If not, we already briefly described the coordination that RCRA and GLNPO are already doing.

Tom,

Heather/Scott C can correct me, but I don't believe Superfund is coordinating with other programs in the Upper Trenton Channel area with RCRA/GLNPO? Either way, there is a section where you can describe any coordination efforts. Joe suggested if there is any good news to share for your sites in the area relevant to the topics of redevelopment or cleanups completed, we can add that?

Scott C. and Joe,

Please use the linked document to save any edits and/or comments you have.

Allen,

Do you know of any brownfields sites in this area? We couldn't find any but I wanted to confirm with you before making a statement one way or the other.

Thanks everyone and have a great evening,

Shilpa S. Patel

All-

What we have done in the past is one division gets the letter started, then share with appropriate staff in other divisions for input. ORA usually only gets involved after there is a draft prepared. For the last one on these sites I worked with Shilpa, Molly, Valerie (RCRA) and Heather (GLNPO). We can of course get Alan's EJ input and maybe air division for the powerplants mentioned. I'm not sure how much Brownfields will contribute - the sites she names are not Brownfields but active RCRA and Superfund sites, although I don't recognize Solutia Chemicals.

I was on the last call, and while I recollect Debra stating her preference for working across programs and agencies, I do not recollect her promising a Detroit coordinator. I think someone will need to share the letter with Debra and get her input on how she'd like to respond to that.

Hi-

This is more appropriately a shared response with GLNPO, SEMD, Allen's Brownfields program and OEC/ Congressional liaisons in the Office of the Administrator. I think the congressional staff in the OA are probably the most appropriate to coordinate the overall response.

However, if you'd like LCRD to get things rolling, we can do that by getting folks together to talk about identifying "champion" person to coordinate across EPA programs involved in the Down River area.

If people have other ideas on how this should be handled, please weigh in. Can someone confirm that the RA said we could assign a single point of contact for the Down River work?

Thanks,

Joe
